Party Gear

A hat, wristband, and glove that enhances the party experience. The hat lights up when the "PARTY" tab is attached to it, the glove plays a song and lights up when a button is pressed and the light sensor is covered, and the wrist band displays simultaneous but different light patterns depending on how warm it is (how hard you are partying)!

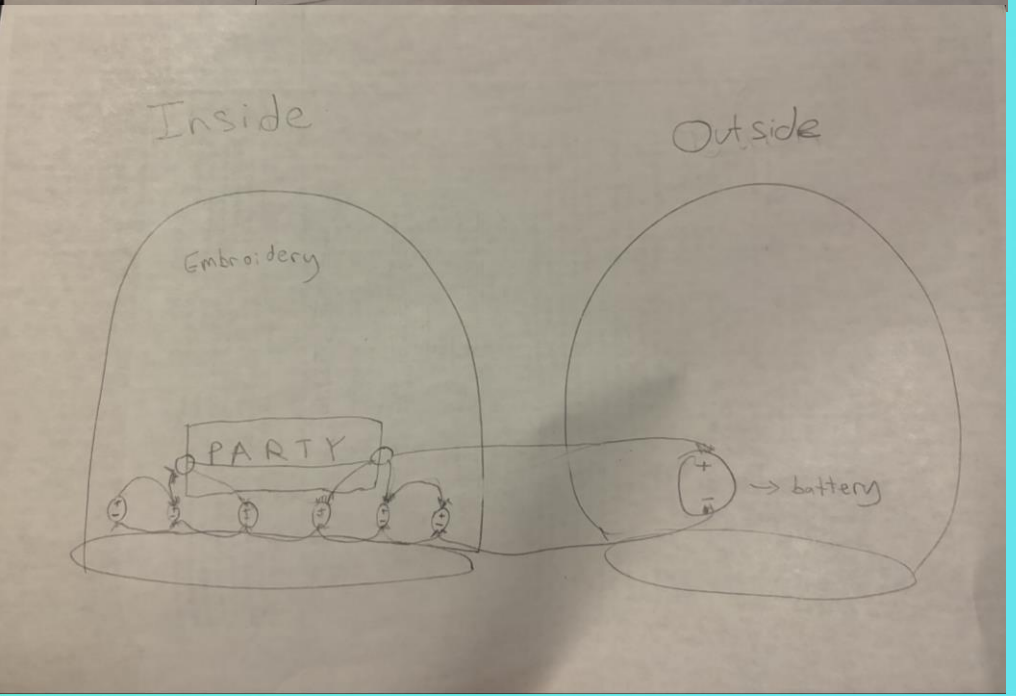

I love to party, so I wanted to create something that is inspired by partying.

Mia Pinc

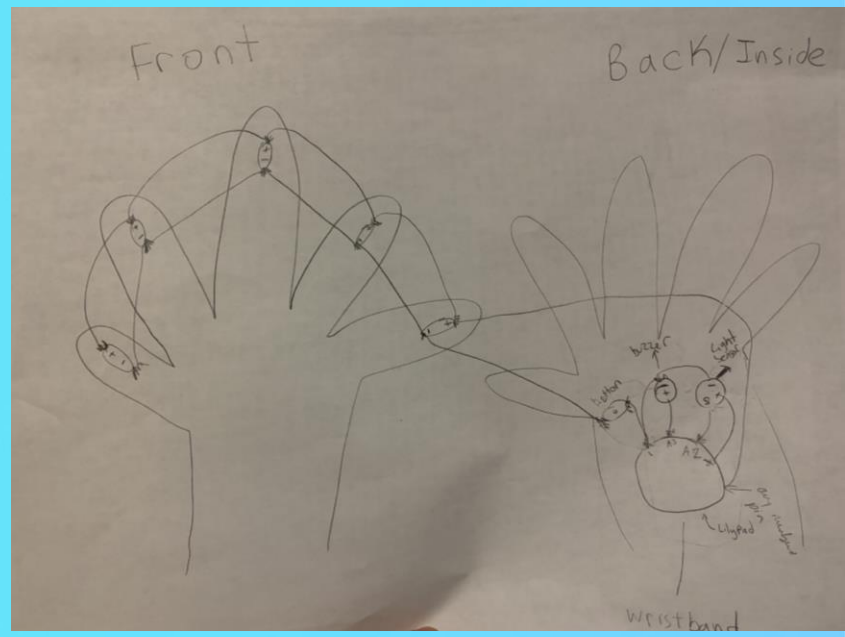

#1 Wristband: Simultaneous, different LED patterns depending on temperature (using temp sensor)

Supplies: 1 LillyPad Pro Board, 1 seweable battery, 1 battery, light sensor, temperature sensor, speaker, scissors, needle, LED lights, need: felt, hat, glove, embroidery floss, conductive thread, snaps, more LEDS

#2 Hat: A homemade button that turns on the LED lights

#3 Glove: Plays a sound and displays LED lights based on light (light sensor) and button being pressed
